PROFESSIONAL SUMMARY

Computer Science (Data Science) undergraduate with strong foundations in Python, Java, Data Structures & Algorithms, Object-Oriented Programming, REST APIs, and backend development. Experienced in building AI-powered applications using Streamlit, RAG, Computer Vision, TensorFlow, PyTorch, and SQL. Hands-on experience with AI-assisted development tools, cloud platforms, and Git-based workflows. Passionate about developing scalable software systems, intelligent automation solutions, and modern AI-driven applications while continuously learning emerging technologies.

EDUCATION

Ace Engineering College CGPA:8.50
Bachelor of Technology in Computer Science *Aug 2023 – May 2027*
Alphores Jr. College GPA: 8.80
MPC Stream *June 2021 – May 2023*

TECHNICAL SKILLS

- **Languages:** Java, Python, SQL, R, HTML/CSS, JavaScript.
- **Core Computer Science:** Data Structures & Algorithms, OOPs, DBMS, Problem Solving
- **AI & Machine Learning:** Machine Learning, RAG, Computer Vision, AI Workflow Automation
- **Frameworks & Libraries:** Streamlit, TensorFlow, PyTorch, OpenCV, NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn
- **Cloud & Tools:** Git, GitHub, Oracle Cloud Infrastructure (OCI), Google Cloud, MCP, Linux (Basic), REST APIs (Basic)

PROJECTS

MCP-Powered RAG Video Intelligence Platform

- Developed an MCP-powered AI video intelligence platform using Python, Streamlit, and RAG for semantic video understanding, conversational querying and contextual retrieval across YouTube and local video content.
- Built a modular multimodal architecture integrating MCP tools, semantic search, conversational memory, intelligent clip generation, AI-based notes generation and timestamp-aware video processing pipelines.

Real-Time Object Detection & Segmentation using YOLOv11

- Developed a real-time object detection and segmentation system using YOLOv11, OpenCV, and Streamlit supporting webcam, image and video inference with dynamic model switching and interactive visualization.
- Designed a modular computer vision pipeline featuring real-time object counting, class-wise analytics, optimized frame processing and low-latency inference for scalable real-time performance.

CognitoEDA - Automated Exploratory Data Analysis Platform

- Developed **CognitoEDA**, an AI-powered exploratory data analysis platform using Python and Streamlit for automated dataset intelligence, visualization, and interactive analytics on CSV datasets.
- Implemented automated EDA, AI-driven insights, correlation analysis, dataset health scoring, and a modular analytics pipeline integrating preprocessing, statistical analysis, and dynamic dashboard generation.

CERTIFICATIONS / ACHIEVEMENTS

- **Oracle Cloud Infrastructure (OCI) 2025 Certified Generative AI** Professional – Oracle
- **AI Upskilling: Hands-On Development from Model to App** – Qualcomm
- **ServiceNow Virtual Internship Program** – AICTE, SmartBridge & ServiceNow University
- **Google Cloud Generative AI Virtual Internship** – SmartBridge & SmartInternz
- **Artificial Intelligence & Data Analytics Virtual Internship** – AICTE, Shell & Edunet Foundation
- **CCNA: Networking, Security & Automation** – Cisco Networking Academy
- **Android Development & AI/ML Program** – Google for Developers (EduSkills)

HOBBIES / STRENGTHS

- **Hobbies:** Exploring AI Technologies, Internet Trends, Photography, Travelling.
- **Strengths:** Problem Solving, Good Communication Skills, Rapid Learning & Adaptability.
- **Others:** Team player and hardworking individual.
