Professional Summary

Computer Science (Data Science) undergraduate focused on backend development and applied AI/ML. Builds and ships end-to-end applications spanning REST APIs, computer vision, retrieval-augmented generation, and data analytics, using Python, Java, Streamlit, TensorFlow, and PyTorch. Comfortable working across cloud platforms (OCI, GCP) and Git-based workflows, with a track record of taking projects from prototype to a working, demoable product.

Education

Ace Engineering College CGPA: 8.50 / 10.0
Bachelor of Technology in Computer Science (Data Science) *Aug 2023 – May 2027*

Technical Skills

Languages: Java, Python, SQL, R, HTML/CSS, JavaScript.
Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Problem Solving
AI & Machine Learning: Machine Learning, Retrieval-Augmented Generation (RAG), Computer Vision, AI Workflow Automation
Frameworks & Libraries: Streamlit, TensorFlow, PyTorch, OpenCV, NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn
Cloud & Tools: Git, GitHub, Oracle Cloud Infrastructure (OCI), Google Cloud, MCP, Linux, REST APIs

Projects

MCP-Powered RAG Video Intelligence Platform | *Python, Streamlit, RAG, MCP*
- Architected a multimodal video intelligence platform integrating Model Context Protocol (MCP) and retrieval-augmented generation for semantic querying and contextual retrieval across YouTube and local video streams.
- Engineered timestamp-aware processing pipelines, automated AI note generation, conversational memory, and intelligent video clipping for low-latency retrieval.

Real-Time Object Detection & Segmentation (YOLOv11) | *Python, YOLOv11, OpenCV, Streamlit*
- Developed a real-time computer vision system supporting live webcam and video inference, with dynamic model switching and interactive confidence thresholding.
- Implemented class-wise object counting and optimized frame processing for smooth, low-latency inference.

CognitoEDA: Automated Exploratory Data Analysis Platform | *Python, Streamlit, Pandas, Scikit-learn*
- Built an automated dataset intelligence platform that ingests raw CSVs to compute health scores, statistical summaries, and correlation matrices.
- Implemented dynamic dashboard rendering with interactive visualizations, automating exploratory analysis that would otherwise require manual scripting.

Experience

InAmigos Foundation
Web Development Intern (Virtual Internship) *May 2026*
- Collaborated with the development team to build responsive, accessible front-end web interfaces using standard web technologies.
- Contributed to UI component integration and code reviews; received a Certificate of Internship and Letter of Recommendation.

Certifications / Achievements

- Oracle Cloud Infrastructure (OCI) 2025 Certified Generative AI Professional – Oracle
- AI Upskilling: Hands-On Development from Model to App – Qualcomm
- ServiceNow Virtual Internship Program – AICTE, ServiceNow University
- Claude Platform, Claude Code, Claude with the Anthropic API – Anthropic Academy
- Artificial Intelligence & Data Analytics Virtual Internship – AICTE, Shell & Edunet Foundation
- CCNA: Networking, Security & Automation – Cisco Networking Academy
- IBM SkillsBuild AI & Cloud Virtual Internship – Edunet Foundation & AICTE
- Additional: Google Cloud Generative AI Virtual Internship (SmartBridge & SmartInternz); AI-ML Internship (Google for Developers/EduSkills; AI Skills Passport (EY & Microsoft); TCS iON GenAI Essentials; 1M1B AI for Sustainability

Strengths & Interests

Core Strengths: Analytical Problem Solving, Rapid Learning & Technology Adaptability, Technical Communication.
Hobbies & Interests: Exploring Emerging AI Technologies & LLMs, Tech Trends, Traveling.
